Texas Medicaid Project To Advance Value Based Care

Lisa Kirsch

February 21, 2018

# Dell Med/Episcopal Health Foundation Project with HHSC

To provide information and support on options for advancing value-based payment in Medicaid to Texas decision makers, HHSC, and the HHSC Value-Based Payment and Quality Improvement Advisory Committee by early 2018.

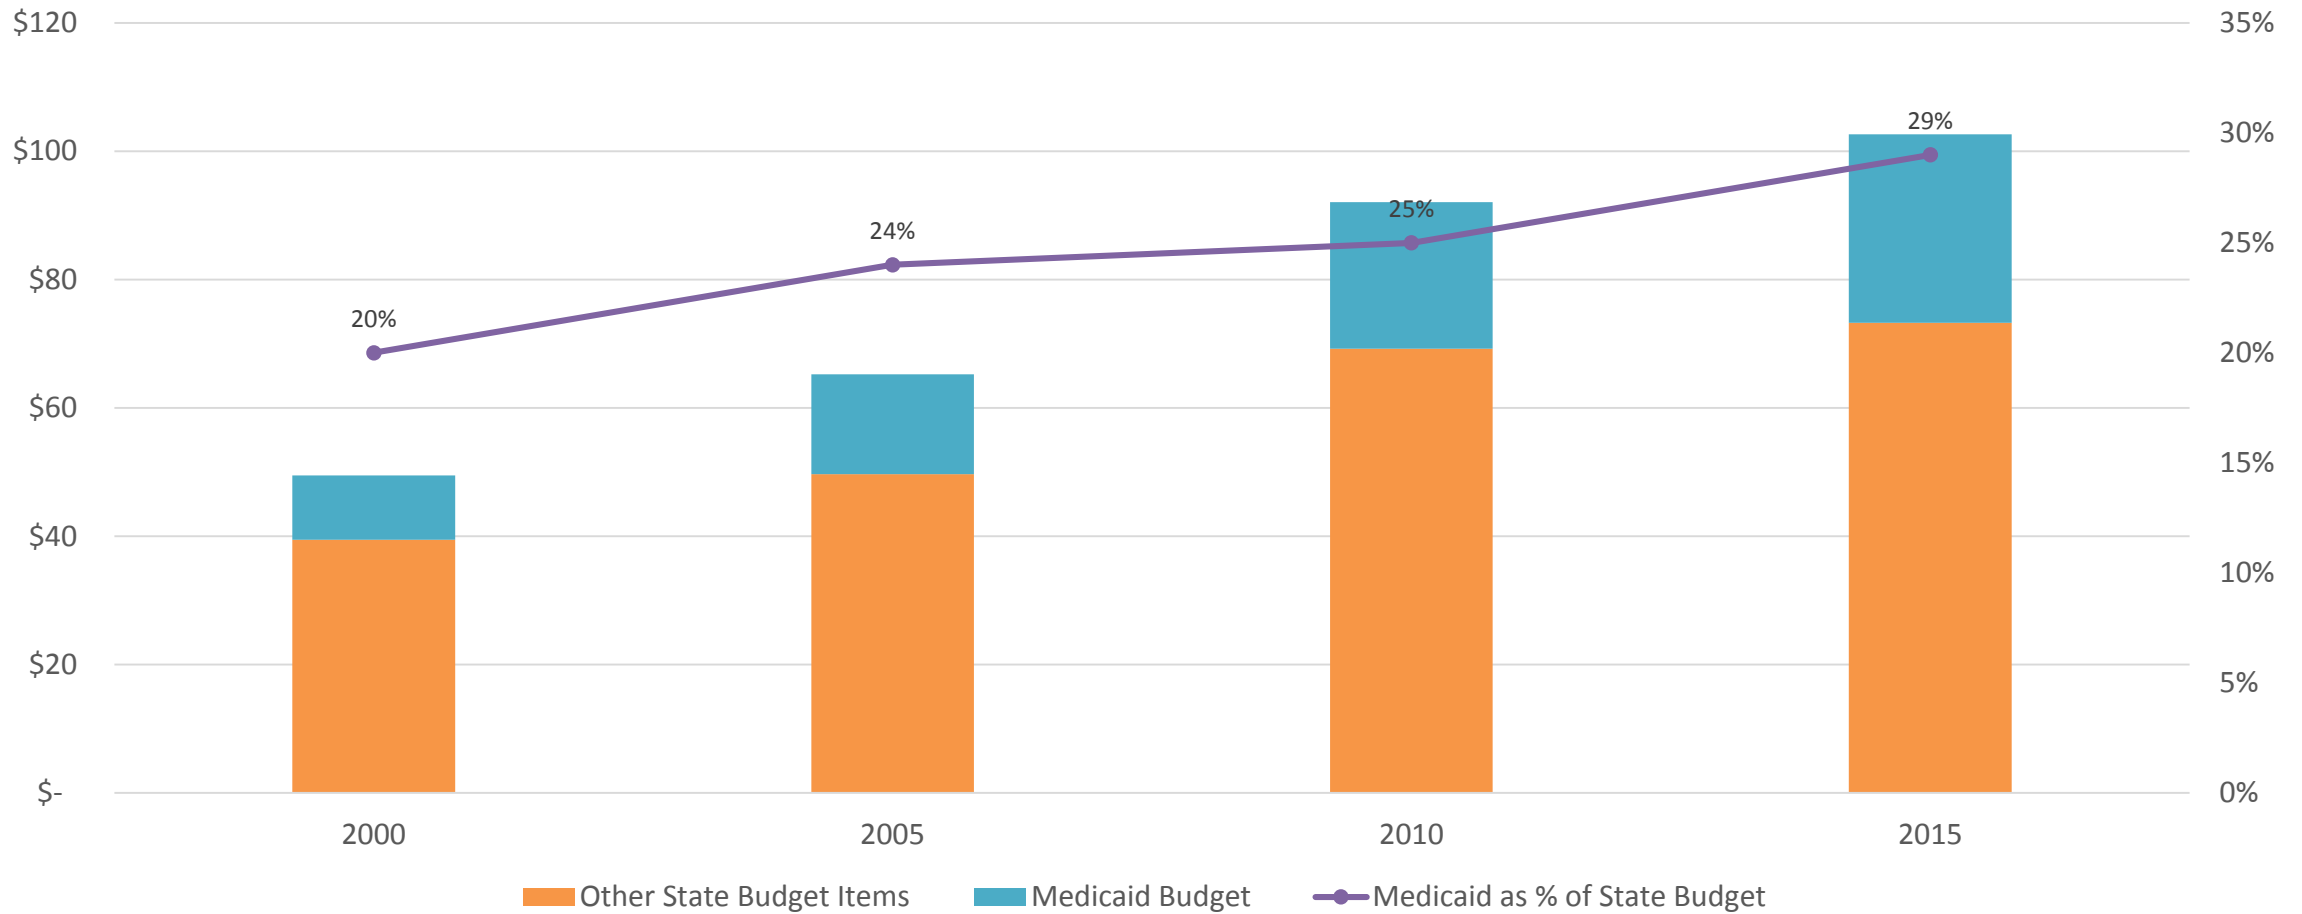

EPISCOPAL HEALTH  
FOUNDATION

# Medicaid is a Growing Share of the Texas State Budget (in Billions)

*Texas Medicaid and CHIP in Perspective, HHSC, February 2017*

# Alternative Payment Models (APMs)

*The Alternative Payment Model framework is a step toward the goal of better care, smarter spending, and healthier people...*

- For payment reform capable of supporting the delivery of person-centered care
- For generating evidence about what works and lessons learned

# 2016 LAN Payer Survey

## LAN PARTICIPANTS

**40** HEALTH PLANS and **TWO** Medicaid States, responded directly to the LAN.

Representing over

**128** MILLION AMERICANS, and...

Approximately

**44%** of the **COVERED POPULATION**

## LAN PARTICIPANTS BY SERVICE LINE

	# of Plans	Covered Lives	% of Covered Population
COMMERCIAL	26	90M	44%
MEDICARE ADVANTAGE	23	10M	58%
MEDICAID +2 FFS States	28	28M	38%

## TRADITIONAL MEDICARE

**38**

Million Medicare FFS beneficiaries

**100**

% of the covered population

# 2016 Results

...In Categories 3 & 4

## % of Healthcare Dollars

\*The "25%" above does not include the "30%" traditional Medicare.

# Value-Based Payment and HHSC

From HHSC's Draft Value-Based Purchasing Roadmap (8/2017):

*VBP = Linking health care payments to measures of quality and/or efficiency  
(outcomes/cost = value)*

*Through its managed care contracting model, HHSC is making progress on a multiyear transformation of provider reimbursement models that have been historically volume based (i.e., fee-for-service) toward models that are structured to reward patient access, care coordination and/or integration, and improved healthcare outcomes and efficiency.*

# Key HHSC Managed Care Contract Provisions

- Starting this year, a certain percent of each health plan's payments to providers must be in quality based payment models/alternative payment models, with possible health plan monetary penalties if thresholds aren't met. Thresholds increase over time.
- New Quality Improvement category allowed to be counted as medical (vs. administrative) expenses.
- Three (3) percent of each health plan's payment is at risk for a Pay for Quality (P4Q) program, so certain outcome measures must be met to earn these funds.

# High-Impact Areas of Opportunity

- **Data sharing initiatives** with plans, providers and consumers to support care coordination
  - *Lack of access to data is a barrier to providers and without data, population health management is impossible.*
- **Value-based maternity/newborn care** - Consider an HHSC-supported episode of care with provider incentives based on quality and cost
  - High volume, high cost area for Texas Medicaid with below average outcomes and significant variation in services
- **Patient centered medical homes/health homes** (including integrated behavioral health and screening for social determinants)
  - Many current MCO incentive programs focus on primary care and chronic care management incentives, and DSRIP focused heavily on health homes and integrated care
- **Telemedicine/telehealth**
  - Potential to increase access through telemedicine/telehealth, spurred by SB 1107

# High-Impact Areas of Opportunity

- **Foundational steps to VBP for small and rural providers**
  - Small and rural providers have fewer resources to transform their practices, so need support to engage with health plans in VBP arrangements
- Feasible steps to support investments in **integrating medical and social services** to address social determinants of health care utilization and outcomes for high-risk individuals
  - *There is emerging evidence that addressing health-related social needs through enhanced clinical-community linkages can improve health outcomes and reduce spend, particularly for high needs, high cost patients*
- **Next phase of DSRIP** – How it can be leveraged to advance value-based purchasing
  - During the next few years, TX stakeholders need to collaborate to sustain successful DSRIP initiatives and build on DSRIP's increased access and improved outcomes for Medicaid and the uninsured.
- **Opioid** overuse and management
  - Medicaid should explore VBP models to support improved treatment and access to medication assisted therapy.

# Potential Pharmacy Roles in VBP

- Medication Therapy Management (MTM)
  - Medicare Part D Enhanced MTM model began January 2017
  - In Texas Medicaid health plans and hospitals have financial incentives to reduce Potentially Preventable Readmissions
- Team member in Accountable Care Organizations, Patient Centered Medical Homes
- Episode-based payments - help manage high cost drugs
- Screening tests, wellness programs, vaccinations and educational events
- Specialty Pharmacy
- Opioids
